Dear [Senator or Congressman] [name],

I am writing to you today regarding an issue that has been at the forefront of Americans' concerns since the startling revelations of Edward Snowden, that of the NSA's outrageous actions against the Constitution and against the American people.

They spy on every telephone conversation and email message in the United States. They have deliberately worked towards the weakening of encryption standards used to secure our most sensitive electronic transactions and communications. They secretly scan the contents of the online calendars and address books used by American citizens. They covertly store and analyze this data in huge, secretive data centers. They even stealthily intercept computer shipments inside the U.S. in order to plant spyware. This is not a war being waged by a foreign power, but one being waged against us by our very own National Security Agency.

This kind of extreme, en-masse fishing expedition flies directly in the face of the 4th Amendment. In point of fact, the NSA personnel responsible for these transgressions are clearly guilty of sedition against the Constitution and treason against the American people. The NSA has become the enemy within, waging an all too real cyber-war against U.S. citizens. They have become defacto cyber-terrorists. This is precisely what your oath of office is referring to when it uses the language "*defending the Constitution against all enemies, foreign and **domestic***" (emphasis added). We in the U.S. spent decades fighting Communism at great expense of lives and treasure, only to now have an East German Stasi-style organization arise in our midst. This cannot be tolerated.

To this end, I believe that the [Congress or Senate] should adopt a resolution recommending the criminal prosecution for sedition and treason of Keith Alexander, James Clapper, and all others responsible for forming and implementing NSA policy; and that these individuals be executed upon being found guilty of these crimes. *The death penalty is clearly the appropriate punishment for these heinous crimes against the Constitution and the American people, we must send the strongest possible message to those who would dare to erect a police-state surveillance infrastructure within the United States.* If the NSA is not stopped we will soon be living in an Orwellian police state rather than a free society.

Thank you for your time and consideration in this matter.

Respectfully yours,

[Your name]
